Phone: 479-997-1338

Fax: 479-997-1013

E-mail: pvwater@windstream.net

I understand it is my responsibility to make sure that the residence I am purchasing/ renting has a **Shut-Off Valve**, **Pressure regulator**, and **Check Valve** on my side of the water meter. If the residence does not have the above I will be given thirty (30) days in which to install them.

If I choose not to install a **Pressure Regulator** and my water pressure is fine, I will hold Pleasant View Water Facilities Board harmless for any excessive water pressure to my service line or water pipes in my house and any other damage that may be a result of high water pressure.

It is very important to install a **Check Valve** on your line; we are continually flushing our lines to ensure water quality. While flushing our lines it is possible, without a **Check Valve**, that your lines can be drained which can result in damage to your hot water heater.

I have read and understand the above.
